

Onur Geneş

Software Developer

Summary

- I am experienced in Software Development to create fast and responsive apps. I want to be a part of modernizing the digital world and I am eager to work with co-thinkers since I really want to contribute to the digital world and make my projects come true.

I am constantly trying my best to learn new architectural designs, new patterns and also new libraries. I am also trying to apply them to my projects.

Experience

03/2014 -
11/2016

● **Software Developer**

Self Employed

I have so many projects and ideas to create. Now I am trying to build apps and their REST APIs for sharpening my skills and learning new technologies.

- Created own backend, REST API for my apps.
- Helping big companies for fast solutions and references. (Limak Teknoloji, Unilever etc.)
- Teaching my knowledge to others with my blog (<https://devgenes.com>) or Medium.
- Creating and updating my apps on App Store.
- Learning different technologies like Web Development, Server Development etc.
- Trying to keep up with Swift news.
- Learning Kotlin for Android Development.
- Improving my App Store Optimization and design techniques.

Education

10/2012 -
07/2019

● **Ankara University**

- Electrical and Electronics Engineering
- 2.75 GPA
- Final project is about "Machine Learning"

References

- Nizameddin Ordulu - +90 (507) 146 06 85

Mr. Nizameddin (ex Google and Facebook Employee) is a really talented person. We worked together for 8 months at Ordulu Bilgi Teknolojileri.

Interests

- Video Games. Especially Battle Royale.
- Coffee. I really like coffee and have special interested on coffee tasting and coffee making.
- Electronic Music. Especially Dark Synth and Synthwave.
